Facts About Our Products

Material

Our pieces are constructed from premium grade, southern yellow pine that is pressure treated with a chemical compound called *Natural Select*. It is a unique preservative made from recycled copper and an organic fungicide that leaves wood with a natural appearance.

Quality

The attention we devote to the components incorporated into our products insures many years of use. *Stainless steel or ceramic coated screws and zinc-plated bolts are used to avoid rusting, while hinges and bearing arms have a powder coated finish.* Our pieces can be stained or painted if desired. Left unfinished, the natural honey brown color will slowly fade to gray.

Craftsmanship

You will immediately notice a difference with our products. They look attractive because we're particular about the appearance of the wood we use. Each piece is *hand inspected for knots, blemishes and discoloration. All edges have been rounded down and surfaces are sanded so that each piece has a smooth finish. Joints have been milled to exact tolerances for a tight fit and laminated with water resistant exterior glue wherever appropriate.* The lattice is made with 1.5" x .5" lumber strips, which gives our lattice panels a total thickness of 1". Throughout our furniture line, back position, seat contour and arm height all combine to create a comfort that's easy to recognize and appreciate.

A. Planter & Trellis Combo

19" square planter box with plastic liner (Item C61) and 19" arch trellis (Item C60)
